

Sending distributed traces to Jaeger in AKS

Start

Let's now update our microservices so they can start sending traces to Jaeger in AKS.

In all microservice repos

1. Update HELM_CHART_VERSION in .github\workflows\ci.cd.yml:

```
build-and-deploy-service:
```

```
...
```

```
env:
```

```
...
```

```
HELM_CHART_VERSION: 0.1.2
```

2. Commit and push changes.
3. Wait for GitHub workflow to complete
4. Perform a purchase in frontend portal
5. Trace the purchase in Jaeger portal
6. Try a purchase for more gil than available and trace it in Jaeger portal

In the next module you will enable monitoring
