Creating a Service Bus namespace

Let's create the Azure Service Bus namespace that we will use with our microservices in Production.

In Play.Infra repo

1. Update README:

Creating the Service Bus namespace
```powershell
az servicebus namespace create --resource-group $appname --name $appname --sku Standard
```

2. Run the command

3. Check the service bus namespace in Azure portal

4. Commit and push changes

In the next lesson you will update your Common library to add support for Azure Service Bus.
